

**The Australasian College of Phlebology
23rd Annual Scientific Meeting
Hilton Adelaide, South Australia**

CONFERENCE PROGRAM

ACP 23RD ANNUAL SCIENTIFIC MEETING 6 - 9 MAY 2023 ADELAIDE

	Saturday 6th May	Sunday 7th May	Monday 8th May	Tuesday 9th May			
830	Phlebology Training Course	Opening Plenaries	Chronic Venous Disease: What's New and Unusual		830		
900					Duplex Ultrasound in Phlebology	900	
930							930
1000							1000
1030	Morning Tea				1030		
1100	Phlebology Training Course - Basic Stream	Phlebology Training Course - Advanced Stream	Venous Interventions: Cyanoacrylate Closure	Dermatology in Phlebology	Venous Interventions: Endovenous Ablation	1100	
1130						1130	
1200						1200	
1230						Daily Debate	Daily Debate
1300	Lunch				1300		
1330	Phlebology Training Course - Basic Stream	Phlebology Training Course - Advanced Stream	Lymphoedema	Hands On Workshops	Cases and Clinical Puzzles	1330	
1400						1400	
1430						1430	
1500						1500	
1530	Afternoon Tea				1530		
1600	Phlebology Training Course	Patient Management: Updates and Controversies			Speakers Dinner	1600	
1630						1630	
1700		Masterclass				1700	
1730						1730	
1800	Welcome Reception		Conferring Ceremony and Gala Dinner			1800	
Registration	0800-1600	0800-1600	0800-1400	0830-1400	Registration		
Exhibition		1000-1600	1000-1400	1000-1400	Exhibition		
Speaker Room		0800-1600	0800-1300	0830-1530	Speaker Room		

DRAFT PROGRAM ONLY: Program is subject to change

SUNDAY 7th MAY

OPENING PLENARIES

- 830** Introduction to ACP2023
Lisa Marks, ACP President
David Connor, Convener, ACP2023
- 840** Choosing Wisely: What do we know, how do we decide, why do we treat which patient
Erika Mendoza
- 900** TBC
Sriram Narayanan
- 920** Prevention in phlebology – results of PREVENT2
Christof Ragg
- 940** An exciting speaker to be announced here soon

1000 Discussion

1030 Morning Tea

VENOUS INTERVENTIONS - CYANOACRYLATE CLOSURE

- 1100** Allergic contact dermatitis caused by n-butyl-2-cyanoacrylate in VenaBlock vein glue
Stefania Roberts
- 1110** Cyanoacrylate studies
Joseph Grace
- 1120** Drug Device Delineation and Endovenous Medical Glues
Kurosh Parsi
- 1150** Discussion

DAILY DEBATE

7 minutes per speaker, 3 minutes rebuttal

1220 Choose the debate you would like to hear at ACP2023- [Vote here](#)

1. Saphenous Vein Ablation: treating the proximal segment only is short changing the patients
2. Pelvic Vein Incompetence should be treated prior to treating leg veins
3. A cool-off period prior to non-urgent endovenous interventions should be mandatory
4. Deep Vein Incompetence: should the deep veins be ablated
5. Glue ablation of saphenous veins is obsolete

1240 Discussion

1300 Lunch

LYMPHOEDEMA

1400 TBC
Vaughan Keeley

1420 Impact of climatic variations on lymphoedema - the patient perspective
Neil Piller

1430 Manual Lymphatic Drainage versus Intermittent Pneumatic Compression in Lymphoedema Treatment
Erika Mendoza

1440 The impact of cycloid vibration therapy on blood flow, limb volumes and fluid distribution in the leg of a healthy volunteer
Neil Piller

1450 The Different Treatment Options for Breast Cancer-related Lymphedema: Evidence Synthesis Study
Ali Mahdi Al Haddar Al Sakkaf

1500 PhD Studies in Lymphoedema: 3 projects encompassing early detection, education and treatment
Yani Dick

1510 Panel Discussion

1530 Afternoon Tea

PATIENT MANAGEMENT: UPDATE AND CONTROVERSIES

- 1600** Cardiovascular Markers and Screening for Cardiovascular Disease
Andrew Hamilton
- 1620** How to Avoid and How to Treat Telangiectatic Matting
Lisa Marks
- 1630** Lipoedema, What is the Burden of Ignorance?
Christopher Lekich
- 1640** Prophylactic Periprocedural Anticoagulation in Phlebology
Lucy McKinnon
- 1650** Ulcer surgical management for the 1%
Gilles Laur
- 1700** Discussion

MASTERCLASS

- 1715** Overview and Update on Vascular Malformations
Kurosh Parsi

MONDAY 8th MAY

CHRONIC VENOUS DISEASE: WHAT'S NEW AND UNUSUAL

- 830 Bidirectional perforators are never normal
Andre van Rij
- 850 Saphenous Vein Sparing Surgery: Primum non nocere
Erika Mendoza
- 900 TBC
Sriram Narayanan
- 910 Venous Adaptations in Endurance Athletes
Andre van Rij
- 920 Venous insufficiency in children and adolescents: Progression over 4-6 years
Christof Ragg
- 930 Refluxing veins and neuropathy
Gilles Laur
- 940 Eccentric venous ectasias of the intra- and epifascial system: A primary correlate of insufficiency.
Christof Ragg
- 950 Can the treatment of vulval varices, with ultrasound-guided-sclerotherapy alone, be recommended as an effective treatment? What evidence exists to support this?
Tamsyn Newell

1000 Discussion

1030 Morning Tea

DERMATOLOGY IN PHLEBOLOGY

- 1100 Lower Limb Pigmentation: Relative contribution of haemosiderin and melanin in chronic venous disease and other cutaneous disorders
Lois Zhang
- 1110 Reticulate Eruptions: Investigating the Origin
Mina Kang
- 1120 A rare presentation of calciphylaxis
Lois Zhang
- 1130 Vascular Dermatology: Common and Rare
Kurosh Parsi

1200 Discussion

DAILY DEBATE

7 minutes per speaker, 3 minutes rebuttal

1220 Choose the debate you would like to hear at ACP2023- [Vote here](#)

1. Saphenous Vein Ablation: treating the proximal segment only is short changing the patients
2. Pelvic Vein Incompetence should be treated prior to treating leg veins
3. A cool-off period prior to non-urgent endovenous interventions should be mandatory
4. Deep Vein Incompetence: should the deep veins be ablated
5. Glue ablation of saphenous veins is obsolete

1240 Discussion

1300 Lunch

HANDS ON WORKSHOP

ROTATING WORKSHOPS

1400 Join us for a series of Hands On Workshops

1730 Pre Ceremony Drinks and
Ceremony Gowning for ACP Academic Procession and Fellowship Recipients

1800 Conferring Ceremony
and
Gala Dinner
Main Ballroom

TUESDAY 9th MAY

DUPLEX ULTRASOUND IN PHLEBOLOGY

900 Duplex Ultrasound Investigation: Exploration of the GSV
Erika Mendoza

930 The Enigma of the Venous Pulse Wave
Andre van Rij

950 Venous Mapping: UIP Consensus Guidelines
Kurosh Parsi

1010 Panel Discussion

1030 Morning Tea

VENOUS INTERVENTIONS - ENDOVENOUS ABLATION

1100 TBC
Sriram Narayanan

1110 One Year Results of Endovenous Laser Therapy With 1940nm Laser; Longer Wavelength and Lesser Energy Density (Level 2 Study)
TBC

1120 Intraindividual comparison of 1470 nm and 1940 nm endovenous laser systems and Biomatrix sclerosing foam.
Christof Ragg

1130 Endovenous laser ablation using 1940 nm laser
Shivakumar Sethuraman

1140 Hyaluronan gels in the treatment of valve lesions, vein dilatations and insufficiencies
Christof Ragg

1150 Panel Discussion

DAILY DEBATE

7 minutes per speaker, 3 minutes rebuttal

1220 Choose the debate you would like to hear at ACP2023- [Vote here](#)

1. Saphenous Vein Ablation: treating the proximal segment only is short changing the patients
2. Pelvic Vein Incompetence should be treated prior to treating leg veins
3. A cool-off period prior to non-urgent endovenous interventions should be mandatory
4. Deep Vein Incompetence: should the deep veins be ablated
5. Glue ablation of saphenous veins is obsolete

1240 Discussion

1300 Lunch

CASES AND CLINICAL PUZZLES

1400 Skin cancer and Phlebology
Gilles Laur

1410 Superficial thrombophlebitis - the underlying intricacies
Lois Zhang

1420 Venous Disease, Wounds and other Co-existing Diseases, in a Community-based Vascular Diagnostic Clinic
Monika Samolyk

1430 Lower limb ulcers - is it that simple?
Lois Zhang

1440 A mysterious lump in the groin
Nicole Curtis

1450 First Experience For Iliac Vein Stenting By Coronary Balloons In A Young Case Of Reverse May-Thurner Syndrome
Mehrdad Honarvar

1500 Panel Discussion

1530 ACP 2022 Closing

POSTERS

- POSTER 1 Sclerotherapy for Dorsal Hand Veins – a Literature Review
Mei-Jo Sung
- POSTER 2 Measuring population-based outcomes of deep venous intervention is challenged by limitations in administrative health codes
Vanessa Irvine
- POSTER 3 The Saphenous Nerve for the Phlebologist
Melanie Andronicus
- POSTER 4 Arterial variations in lower limbs
Babak Khanzadi
- POSTER 5 Bone Perforator – A rare source of a non-saphenous reflux
Gaorui Liu
- POSTER 6 A systematic literature review of the management of superficial vein thrombosis
Shareen Jacob
- POSTER 7 Heart Sink Patients – can we predict who will get matting
Elizabeth Onley
- POSTER 8 Endovenous Laser Treatment of Varicose Veins: Our Experiences
Rahul Khanna
- POSTER 9 A Comparative Evaluation of Topical Application versus Perilesional Injection of Platelet-rich Plasma in Diabetic Foot Ulcers
Seema Khanna
